Descripción Description

Mirror collection es una colección de espejos de pared con diferentes formas geométricas círculo y rectángulo. Nace de la interpretación de mover o desplazar los objetos sin necesidad de permanencia en un espacio, pudiendo estar un día en el salón y otro en la habitación principal.

La colección cuenta con tres modelos de espejos, circular con pies, rectangular vertical con pies y circular para colgar en pared. Diseñados para apoyar y fijarlos de pie contra la pared, de líneas simples y contemporáneas que juegan con una estructura metálica finalizada en dos pies de corcho que evitan el desplazamiento.

Mirror collection is a collection of wall mirrors in different geometric shapes, both circular and rectangular. It comes from an understanding that objects can be moved or rearranged without them needing to stay permanently in one space, so that one day they might be in the sitting room and another in the main bedroom.

The collection has three models of mirrors, a circular mirror with legs, a vertical, rectangular mirror with legs and a circular mirror to hang on the wall. Designed to lean against or be fixed to the wall, their simple, contemporary lines play with a metal structure finished with two cork feet to prevent slipping.
