n°4

B

Considerando un altezza di erogazione acqua della bocca a mm. 2000 dal pavimento,
è importante che le uscite calda e fredda siano comprese 1500 mm. e i 1700 mm.

- A) Fissare il supporto 1 al muro
- B) Collegare i flessibili all'uscita CALDA / FREDDA prestando attenzione a non invertire le acque.
- C) Aggiungere la colonna doccia al supporto 1 e fissare con la vite 2 la parte inferiore

Considering the exit of the water of the showerhead at 2000mms. from the floor,
it is important that the hot and cold exit are located between 1500mms. and 1700mms. tu the floor.

- A) Fix the support 1 to the wall.
- B) Connect to the flexible to the exit HOT and COLD, keeping attention don't invert the waters.
- C) Hang the shower column to the support 1 and fix the under parts with the screw 2 .
