Krav på tätning gäller både i våtzon 1 och 2. Material för tätning ska fästa mot underlaget och vara vattenbeständigt, mögelresistent och åldersbeständigt.

Below are Swedish recommendations:

When installing on a stud wall at a distance of 1 m from a bath or shower, the wall must always be strengthened. All screws must be fixed to solid structures, such as concrete, studs or special structural components. Screws must not be fixed to flooring or wall sheets alone. Requirements for sealing apply in wet zones 1 and 2. Sealing materials must be fixed to the underlying layer and must be waterproof,
