

Air-Chair — design Jasper Morrison, 2000

Air-Chair is not just a plastic chair: it takes its name from the “air-moulding” technology that makes it possible to create highly resistant yet super-lightweight products out of polypropylene added with fibreglass. Harmonious, dynamic, stackable, and suitable for indoor or outdoor use, Air-Chair creates a welcoming atmosphere anywhere: at home or in a collective space, in the kitchen, the dining room or the garden. Available in a range of colours to suit any taste and style, from simple hues to bright splashes, Air-Chair added also an extra

colour option: pure white, to enhance its refined minimalism and versatility of use and settings.
