## Technology

- Durable canister design has 90% less exposed seal material than a 3" flapper for leak-free performance.
- Single-flush gravity uses the force of gravity and a precision-engineered tank, bowl, and trapway to create a strong siphon during flushing.
- AquaPiston® canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.
- Flush valve's 3:2 ratio harnesses the natural force of gravity and optimizes flush performance.
- Light-touch canister flush requires a lower actuation force than a flapper.
- AquaPiston® canister flush valve optimizes flush performance and resists warping and deterioration.

## Installation

- Standard 12" (305 mm) rough-in.
- DryLock® System saves installation time and helps prevent water leakage.
