DESIGN GIORGIO SILLA

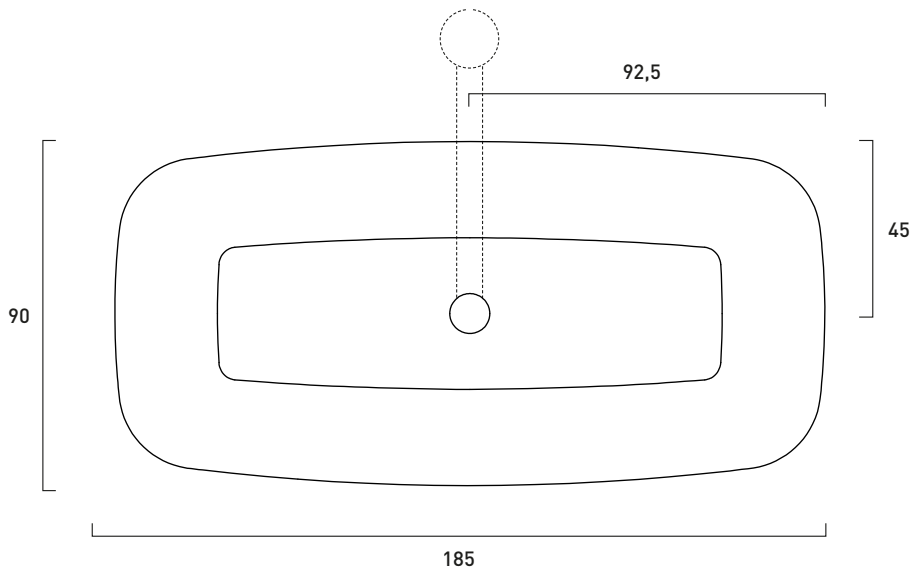

## KALLA / PIETRA

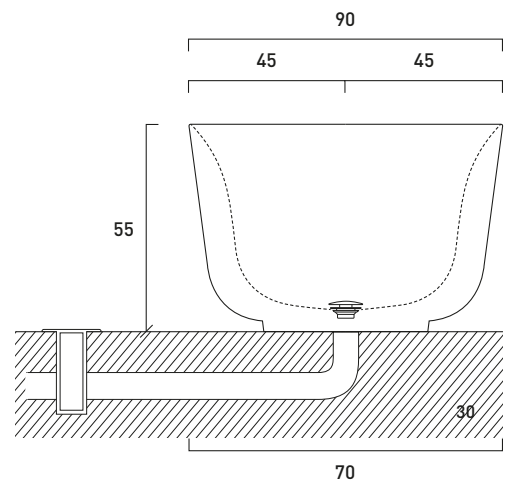

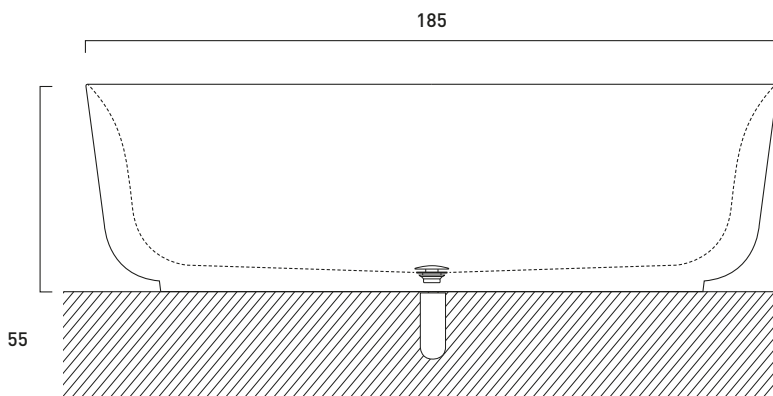

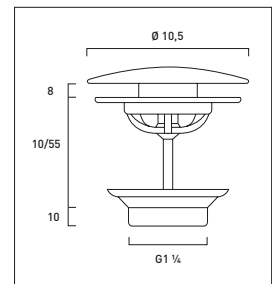

art. KALLA VCP 01

Vasca centro stanza in pietra naturale, ricavata da un unico massello, completa di piletta.

Free-standing bathtub in natural stone, obtained from a single excavated solid, plug included.

Piletta up e down per vasca in pietra.  
Up e down waste for stone bathtubs.

Kg 650

**Si consiglia la realizzazione di un pozzetto ispezionabile esterno al di fuori del perimetro della vasca, il più vicino possibile alla piletta di scarico**

We recomend to realize an external inspectable catch basin outside the perimeter of the bathtub, as close as possible to the drain.
