

Hanging and floor
lighting system

Bailaora

Designer

Enoc Armengol

Producer

Metalarte

Description

Bailaora is a modular and versatile light that has multiple possibilities and compositions. It allows you to create three different heights by stacking modules, hence it can be used as a floor lamp, suspension or change to a desktop lamp if you choose. This is a model that radiates harmony and delicacy, creating a warm and welcoming environment.

Technical Details

Bailaora is a lamp made of a stackable satin methacrylate diffuser covered with EVA foam. This type of material has the curiousness of being innovator with an ultra soft, silky and very durable finish. It is washable and can be recycled.

This lamp is available in white or black.

Light source

E-27 Hi-Spot 120 ° Max 100W/30

Designer

Enoc Armengol was born in Barcelona. Nowadays, he is one of the emerging designers. He has studied and worked as an industrial designer in Barcelona and Milan, with well-known designers studios, including The Vitra Workshops in France. In his designs, Enoc reinterprets the day-to-day objects according to their needs. Bailaora is his first piece that he designs for Metalarte.
