

Benefit from
the best of LED
technology...

Energy efficiency with LED

+6

- 1 Aesthetics
- 2 Energy consumption reduced by more than 50%
- 3 More than 50,000 hours life span
- 4 High safety level
- 5 Environmentally friendly
- 6 The cheapest solution to operate

...combined with the best of Schneider Electric expertise

Spend less

- Life span 5 to 10 times longer than fluorescent tubes
- Maintenance cost reduction
- Extremely low-consumption components (electronic circuits and LEDs).

Totally safe

- 100% of the UV rays emitted by the LEDs are filtered
- Protection of the eyes by a diffuser preventing an excessively large luminous concentration.

Good for the planet

- Solutions for full Energy Efficiency
- Less power needed, less material and smaller batteries used = less impact on the environment.

Eco-design

- Design process complies with the European RoHS directive
- 20% of the plastics used come from recycled materials
- The body, the reflector and the packagings are recyclable.

Reliable

- Certified IMQ, CE, ENEC and AENOR
- Contributes to a high level of safety: different IP and IK, 3 versions available (standard, self-diagnosis, addressable)
- Increased emergency lighting installation service life.

"First-class" LED units

P93160

Quick signal LED **Versatile!**

- Very pleasant lighting (15 LEDs)
- IP40, IK07
- Quick mounting on wall, ceiling or flag, or false ceiling
- Easy maintenance
- Reliable connection
- Aesthetic flush-mounting installation.

P110328

Exiway Plus LED **Styling!**

- Up to 450 lm
- IP42, IK07
- Easy installation and maintenance
- Comprehensive range of functionalities
- Versatile solution
- Easy to connect and maintain
- Time saving for installers.

P122018

Exiway Class **Architectural!**

- 60 to 450 lm
- IP42, IK07
- Innovative attractive design
- High technology (LED, electronics etc.)
- Stylish finishes (mineral glass).
