

Cooker hob Ognidove 5041 245

Cooker hobs

Code: 5041 245

DETAILS

Coloring White

Material AISI 304 stainless steel + ceramic glass

Texture Foster brushed

Supply 230V - 50.60 Hz

Edge/Installation Type Freestanding

Dimensions 380x520 mm

Base size 45cm

Heating element Two zones

Down 180x220 mm-2.100 (2.600)* (3.700)** W

Notes: Sharp edges
Included: Schuko electric plug

Total power 3.520 W

Up 180x220 mm-2.100 (2.600)* (3.700)** W

Power settings 9 power settings per zone + double Powerboost

Safety Safety equipment

Type Induction Hob

Type of commands Touch Control

FEATURES

Double powerboost Two further levels of power up to 3700 W, to be used on a single zone or distributed over the entire Bridge extended area (where available).

End-of-cooking programming All operations are programmed by means of the touch-control on the glass itself. Each cooking plate is capable of independent programming, and thus the possibility to set different cooking times.

Pause Useful function that allows you to distract your attention from cooking, interrupting and restoring the settings immediately.

Pot detector All induction cooker hobs detect the pot resting on them, but they also calculate the area they cover. This system allows the energy to be used even more efficiently. Moreover, the plates switch off automatically when the pot is removed.

Recall This feature allows you to call back the last settings selected in the previous cooking.

Safety	All electric cooker hobs feature the most modern and sophisticated safety protections: Centralised power-off function; Child-proof safety lock; Residual heat warning lights. Induction models feature the following functions: Safety System that turn off the hob in the absence of the pot; Overflow detector that automatically turns off the plate in case of liquid overflow; Automatic deactivation to prevent accidents caused by forgetfulness.
Slider commands	The Slider control allows for extremely quick temperature setting: with a light touch of the finger you may select the desired power level on the TOUCH display.
Smart fan system	Correct ventilation is essential for the induction hob to function in the best possible way. The Foster system automatically regulates the amount of ventilation to suit the temperatures reached.
T-chef function	It's a function that allows to set particular temperatures (42 °C, 70 °C, 84 °C) and keep them constant during cooking. Elaborate preparations can be easily obtained, with chef-like results. Cooking in a bain-marie, without the aid of a double container for the water, custard or cream sauce will thus always be perfect. By setting the temperature close to boiling, liquids will immediately reach the requested temperature, increasing speed and performance.
Timer	Independent timer from the end-of-cooking function.
