

Refrigerator 2037 000

Refrigerators

Code: 2037 000

DETAILS

Supply 220-230V - 50Hz

Alarms Double alarm: door open / temperature

Freezing capability 3,5Kg / 24h

Total gross capacity 263Lt

Freezer net Capacity 71Lt

Refrigerator net capacity 187Lt

Hinges Slide

Climate class SN/T (tropical +10°C/+43°C)

Energy class A+

Annual energy consumption 286kWh

Dimensions 540x1770x545 mm

Lighting LED

Door Reversible - std hinges on the right

Noise level 38dB(A)

Control type Electronic control with LED display

Fridge type combined built-in refrigerator

Type Built-in combined refrigerator

FEATURES

Humidity control The spacious drawer in the bottom area is specifically thought for fruit and vegetables. It preserves the necessary humidity so that the fresh produce can maintain their original amount of water, weight and fragrance.

No-frost freezer The No-Frost technology removes moisture from the freezer with a forced ventilation system in controlled temperature and humidity conditions. No more ice that reduces the usable volume, glues packings one to the other and compromises performance.

Ventilated refrigerator The ventilation of the refrigerator area allows a perfect homogeneity of cooling and improves the preservation of food, ensuring that it remains longer fresh. The system also avoids the formation of odours and condensation on the walls, without changing the internal humidity which prevents the food, especially the fresh ones, from drying in a short time.
