

Stainless Steel Furniture

We make our furniture using 316 “marine grade” stainless steel to withstand the rigours of an outdoor environment.

Stainless steel chairs finished with sling and tables with ceramic tops have a powder coated finish applied to the stainless steel to give the ultimate, low maintenance furniture that looks really good.

Care

We supply a care product to keep your stainless steel, non powder coated finish looking its best. You will find details of this product under the tab **Additional – Care Products**.

If you do not wish to undertake this work yourself and are in the UK we recommend you contact Andrew Banks at www.andrewbanks.co.uk who will maintain your furniture using our care products.
