

## Sink Milanello Gun Metal Workstation 1034 856

Sinks

Code: 1034 856

### DETAILS

Coloring Gun Metal

---

Finish PVD

---

Material AISI 304 stainless steel

---

Texture Satin

---

Base 90 cm

---

Edge/Installation Type Undermount

---

Dimensions 790x466 mm

---

Standard fittings Fixing hooks, gasket, drain, overflow and siphon, boxed packing

---

Mixer holes No standard holes

---

Built-in hole	View technical data sheet (for all Flush-mount / Top-mount models and Under-mount models)
Drainer	No
Width	79 cm
Bowl dimension	750x374mm
Number of bowls	1 bowl
Waste fitting	3,5" Gun Metal drain

## EQUIPMENT

2 x Black grid Milanello 8100 602

## FEATURES

Gun Metal	The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.
Diamond-shape bottom	The draining of water is an important feature in a sink, and it's always taken good care of in Foster products. In the bent-welded sinks, which would have a flat bottom, the proper draining is guaranteed by the elegant beveling, which helps the water flow.
High thickness	1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.
Perimetral overflow	The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.

## Save space system

Drain and siphon are designed to leave as much space as possible in the under-sink area, more and more useful today for theseparate waste collection systems.

---

## Space waste fitting

The elegant SPACE steel cap closes the drain and leaves no visible residues collected in the basket below. Space also has a small footprint and allows the optimal use of the under-sink compartment.

---

## Triple recess - sliding accessories

The Foster Milano sink has an ingenious design that makes it simple to use a large set of optional accessories. On the topmost supporting step, the innovative Black grids slide, creating a large and practical surface to rinse food and crockery. The second step is meant to support and allow the sliding of a complete combination of accessories, which make some operations practical and safe: rinse, drain, slice, grate... everything can be done inside the sink. The third supporting step is on the bottom of the bowl. On this step one can rest the Black grids, making it possible to rinse foodstuffs without their coming in contact with the bottom of the sink, which may be dirty.
