

Napoli Cantilever Parasol – 3.5m and 4m Square

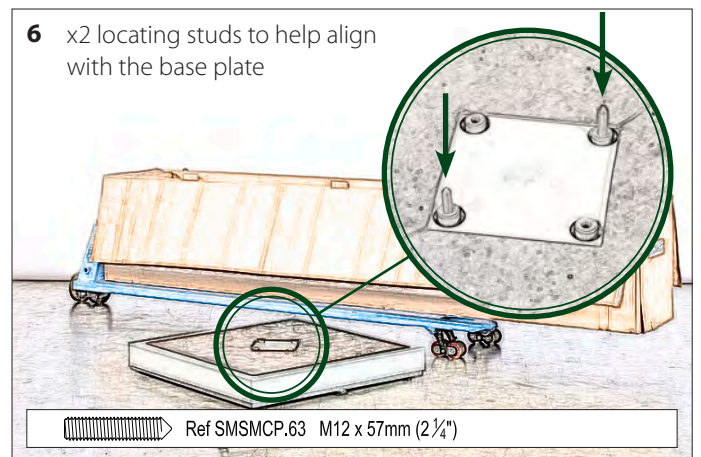

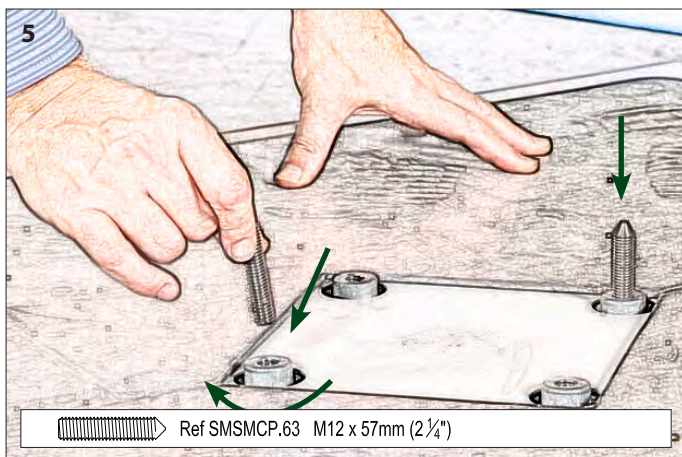

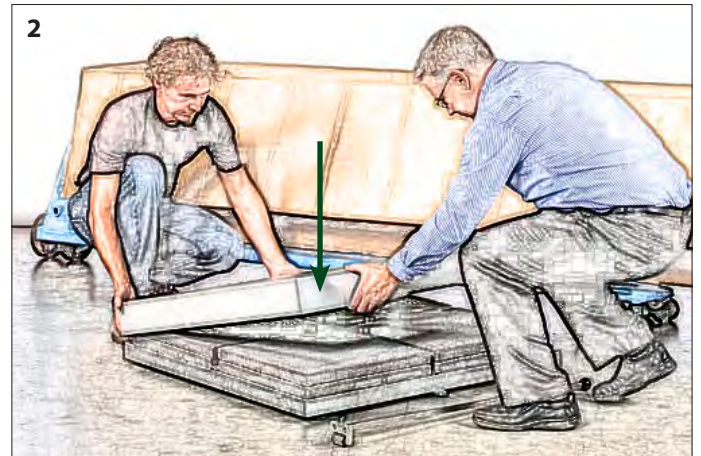

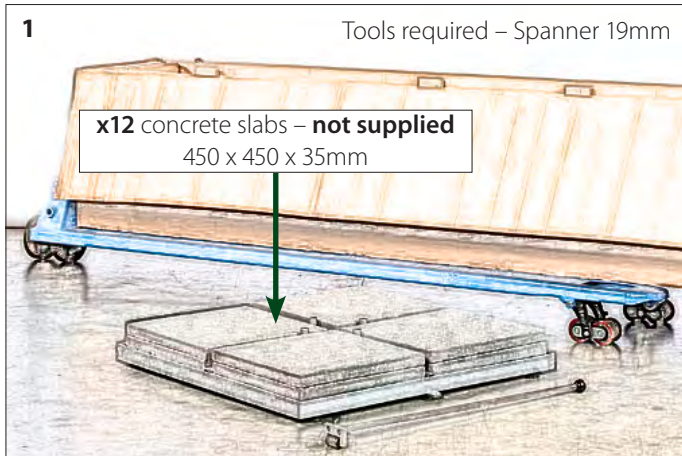

=4NAC35S.04.302 / =4NAC40S.04.302 – Assembly/Operating Instructions

NB: The feet on the base need to be levelled before the parasol is mounted, a critical piece of information, and to choose your location before loading the base. It will be almost impossible to do this once the parasol has been mounted to the base because of the weight and size of the parasol. One of the levellers is in the center of the base so you can't access it after installation.
