PRODUCT DESCRIPTION

Designer: [Urban Design](#)

The structure of the Zig Zag barrier is made in tubular steel, with rectangular section 50x30, 2 mm thickness. The posts are welded together to create a particular, unique pattern characterizing the barrier. For the fixing to the ground, there are 2 plates 80/10 thickness, each one provided with 2 holes 11 mm diam.

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

Max dimensions:

Height: **1000 mm**

Width: **50 mm**

Length: **2000 mm**

Weight: **17 kg**

Material: [steel](#)
