

# CHAIRS: SINGLE WOOD

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

## PRODUCT DESCRIPTION

Designer: [Hangar Design Group](#)

The structure of the chair SINGLE WOOD (A) is made in steel, 60/10 thickness. The upper part of the seat and of the backrest is made in exotic wood, 30 mm thick. The backrest and the seat have geometric figures, shaped with a three-dimensional pantograph. The backrest and the seat are fixed to 2 strong elements in steel (60/10 thickness) through specific bolts. On the base of the chair there are 4 holes (11 mm diam.) for the fixing to the ground through specific bolts (not provided).

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.

### Max Dimensions:

Height with backrest: **860**  
Height of the seat: **450 mm**  
Length: **590 mm**  
Width: **625 mm**  
Weight of steel: **51 kg**

Materials: [steel](#), [wood](#)
