PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The chair SILLON is made in steel, 60/10 thickness. The seat and the backrest are the result of respectively 2 steel sheets welded together and later polished to make the union of the two uniform. The chair is characterized by a particular, laser-cut texture, called NEW YORK. The support feet are created through 90° folds of the extremities of the legs of the bench. Each one is provided with 2 holes (15 mm diam.) for the fixing to the ground through specific bolts (not provided).

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max dimensions:

Height of the seat: **453 mm**
Height with backrest: **605 mm**
Length: **650 mm**
Width of the seat: **453 mm**
Weight: **47 kg**
