

OUT001 - OUT002 - OUT005 - OUT006

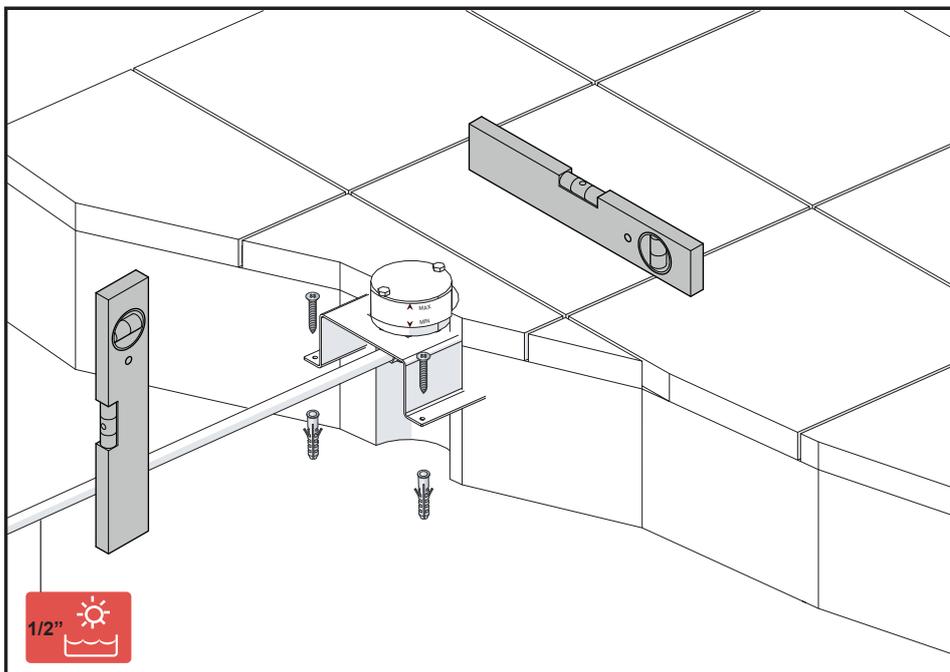

**1**

### Collegamenti idraulici

- effettuare i collegamenti alla rete idrica.

### Plumbing connections

- arrange connection to water supply network.

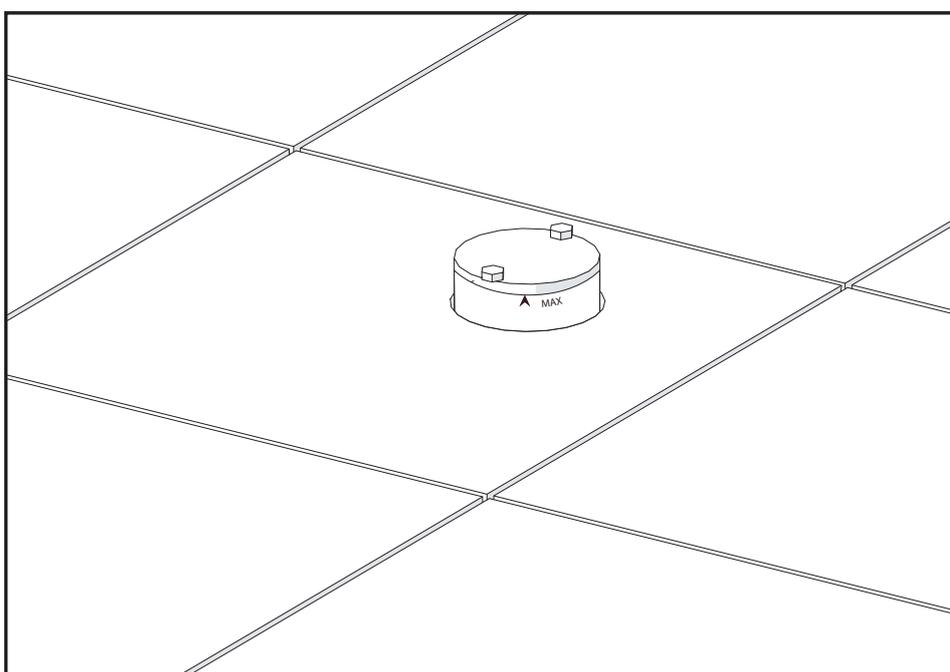

**2**

### Fissaggio parte incasso

- Fissare la parte incasso assicurandosi che sia parallela al pavimento

### Fixing of built-in part

- fix the built-in part paying attention that it's parallel to the floor.

**3**

### Verificare impianto e completare le opere di pavimentazione

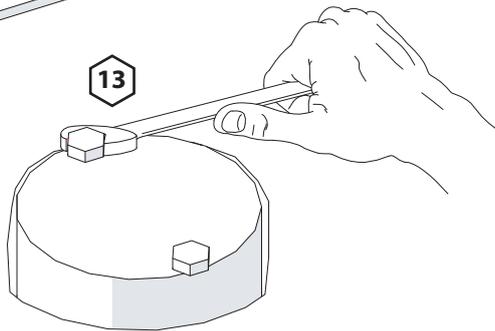

- Dopo aver testato la tenuta dell'impianto procedere con la finitura della pavimentazione, lasciando uscire il tappo in plastico come da etichetta "Minimo-Massimo"

### Verifying the plumbing system and completing the paving

- test the plumbing system endurance, then, complete the paving and let the built-in part plastic cap with the label "MAX - MIN" come out from the floor.

**CHIUDERE L'IMPIANTO!!!  
CLOSE WATER SUPPLY SYSTEM!!!**

**4**

### **Predisporre parte incasso**

- Assicurandosi di aver chiuso l'impianto idrico, svitare le due viti esagonali.

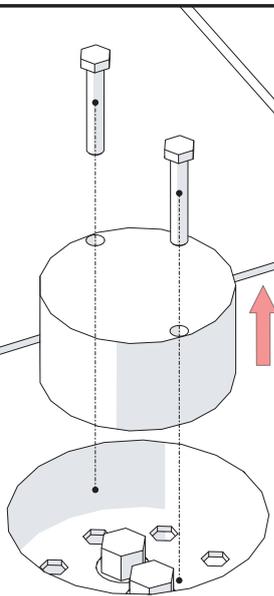

### **Predisposition of built-in part**

- pay attention that the water supply system is closed and unscrew the two hexagonal screws.

**4A**

- Rimuovere le viti e sfilare il tappo nero in plastica

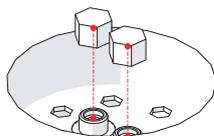

- remove the screws and the plastic black cap.

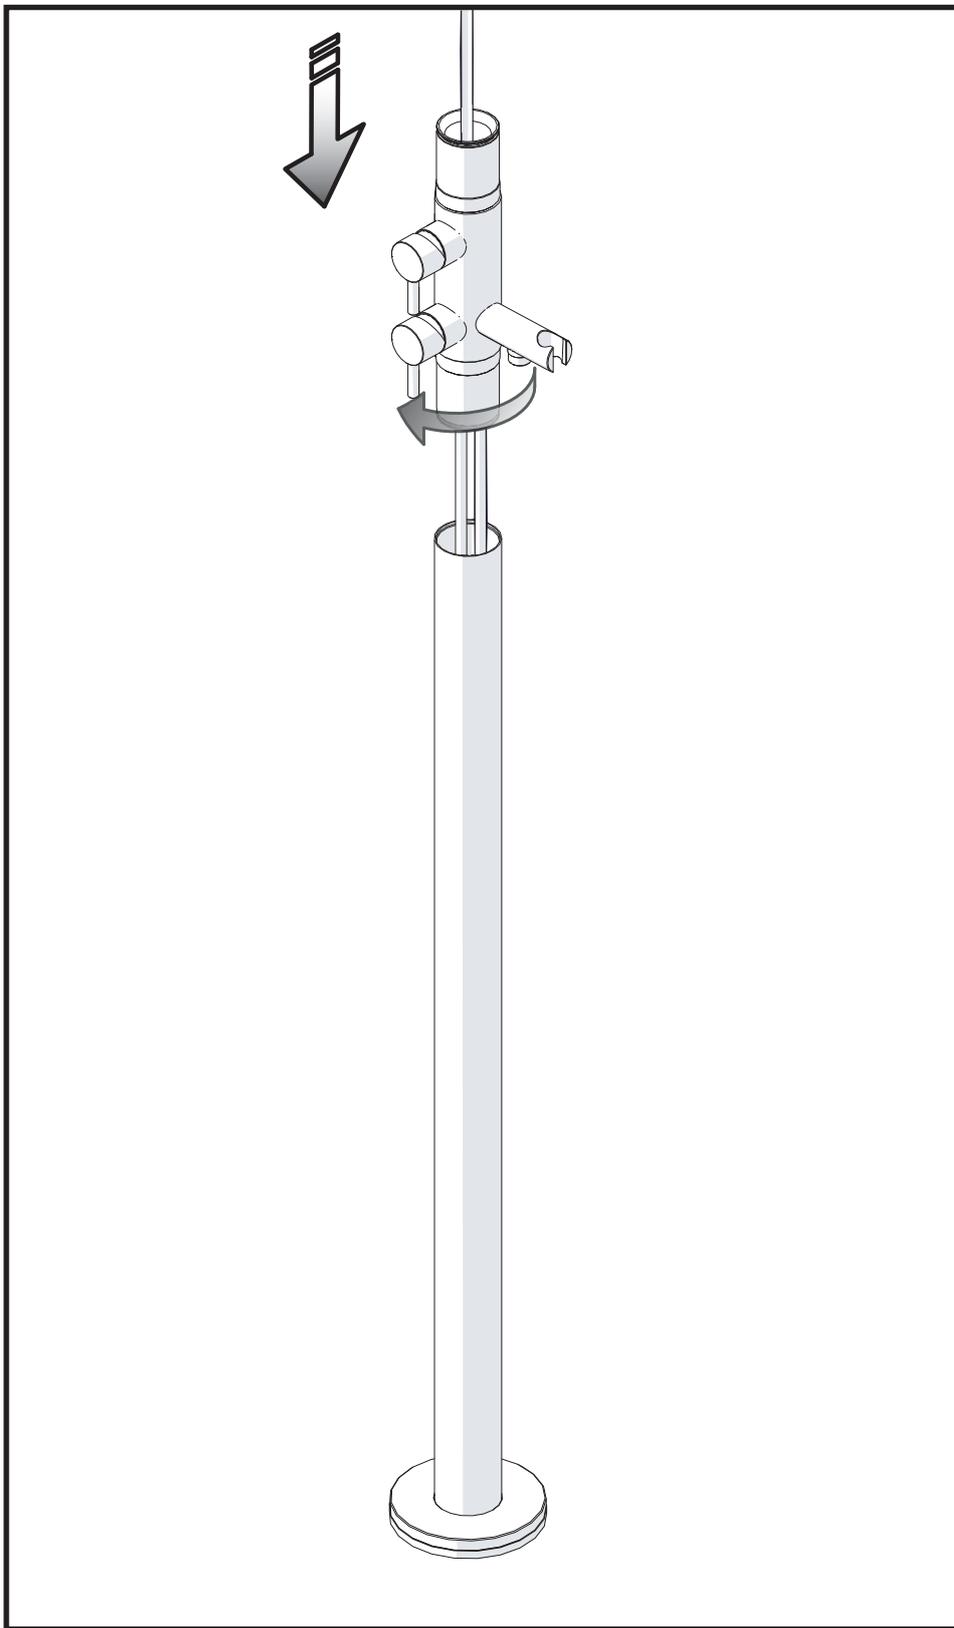

**4B**

- Svitare i 2 tappi di sicurezza

- unscrew the two security caps.

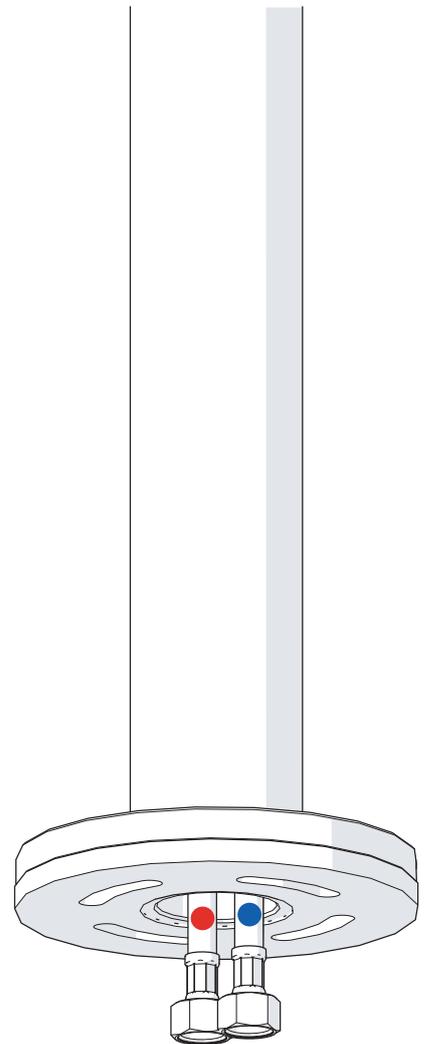

**5**

### Installazione corpo

- Fissare il corpo centrale con i miscelatori nel tubo inferiore della piantana e far passare i 2 flessibili al suo interno.

### Body installation

- Fix the central body in the lower part of the mixer and pass the two flexible hoses inside.

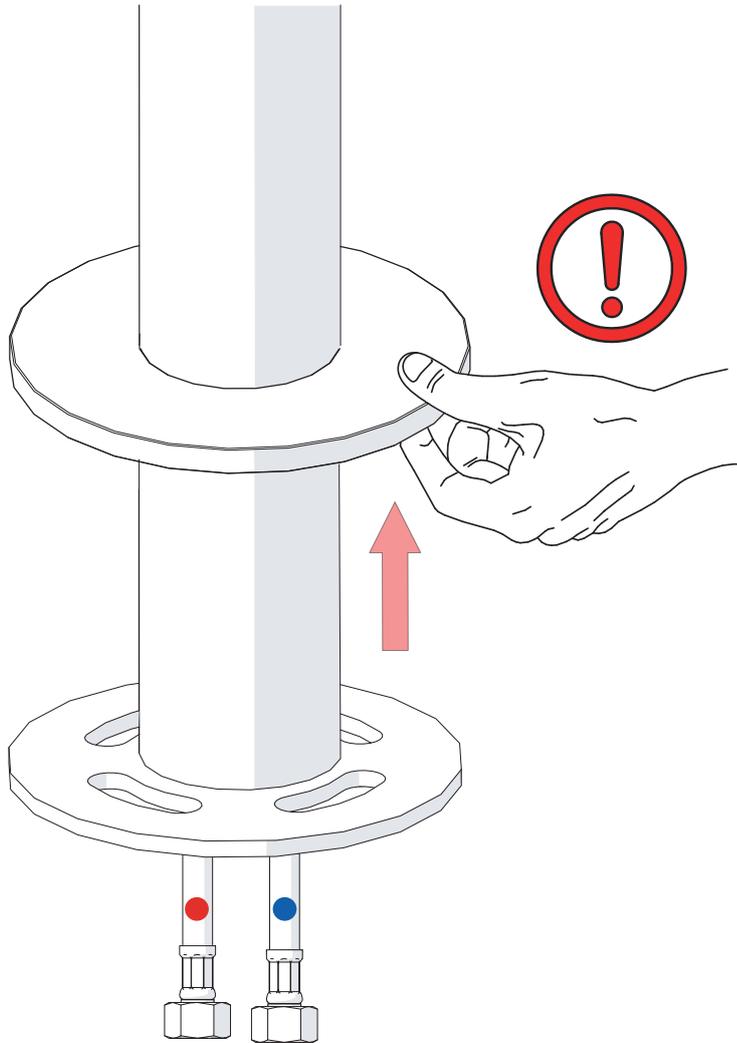

**6****Installazione**

- Alzare la rosetta quanto basta per permettere di lavorare sulla base

**Installation**

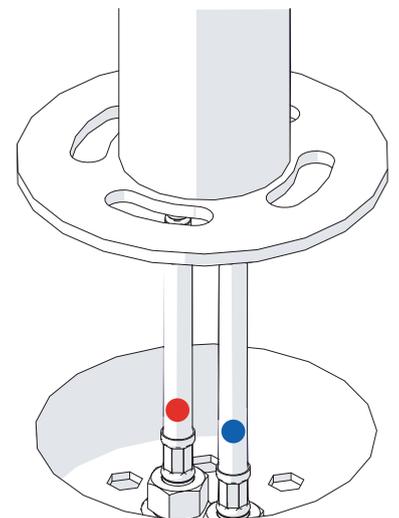

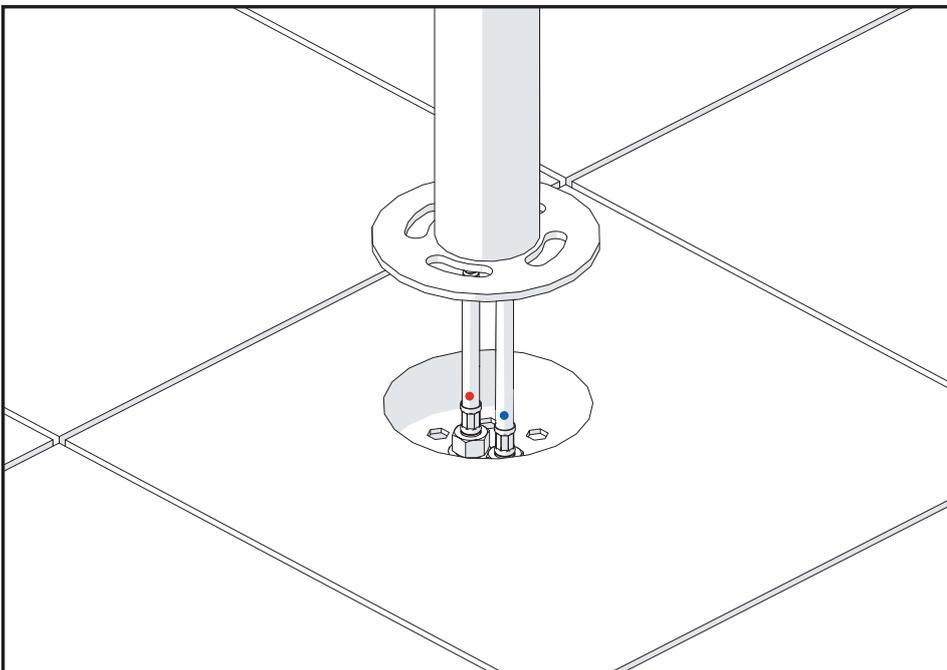

- Raise the plain washer just enough to allow you to work on the base

**7****Collegamenti idrici**

- Collegare i flessibili dalla piantana alla parte incasso, facendo attenzione che non si pieghino, si consiglia di tenerli con una chiave nella parte sopra il dado mentre si avvitano.

**Water connections**

- connect the flexible hoses of the mixer to the built-in part, paying attention that they don't bend. While screwing, we advise to keep them with a key in the part above the nut.

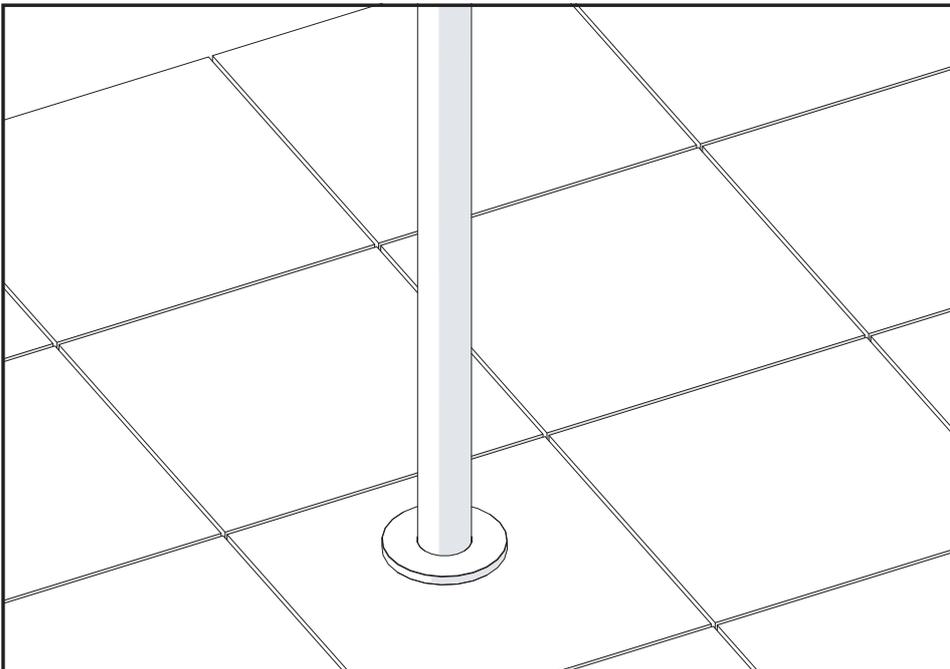

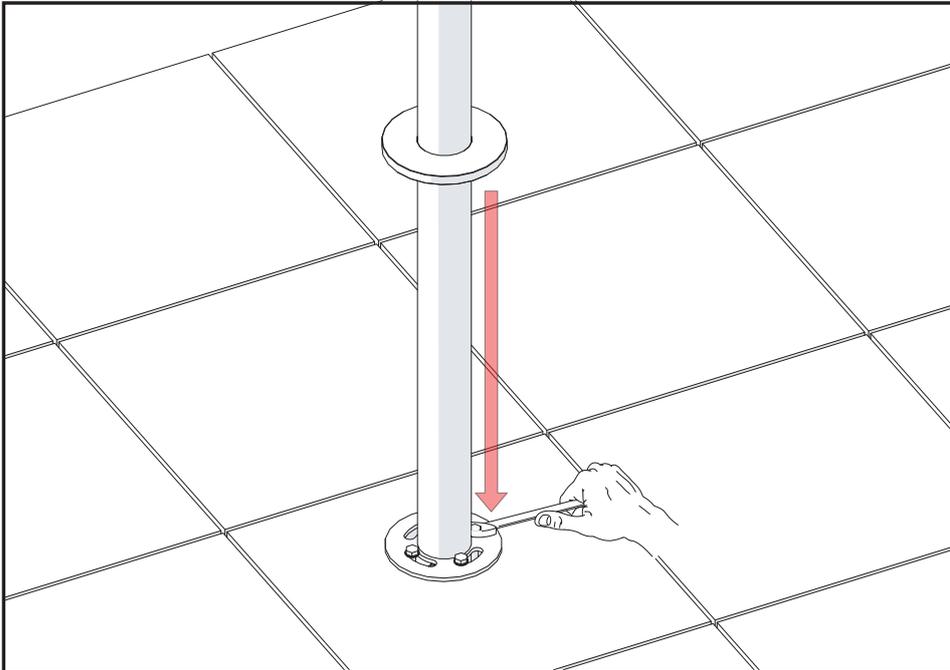

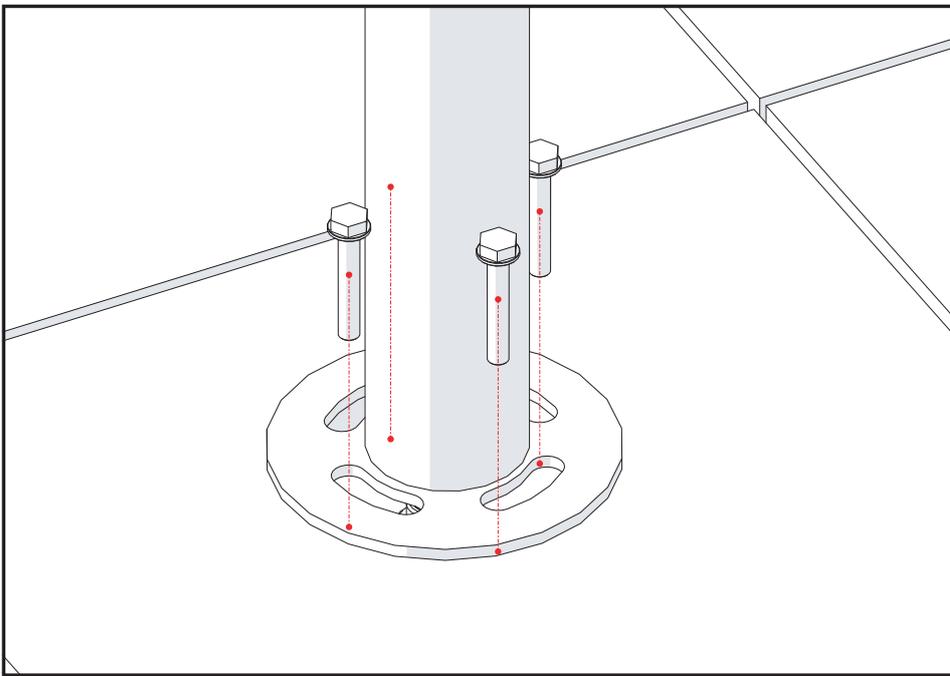

**8**

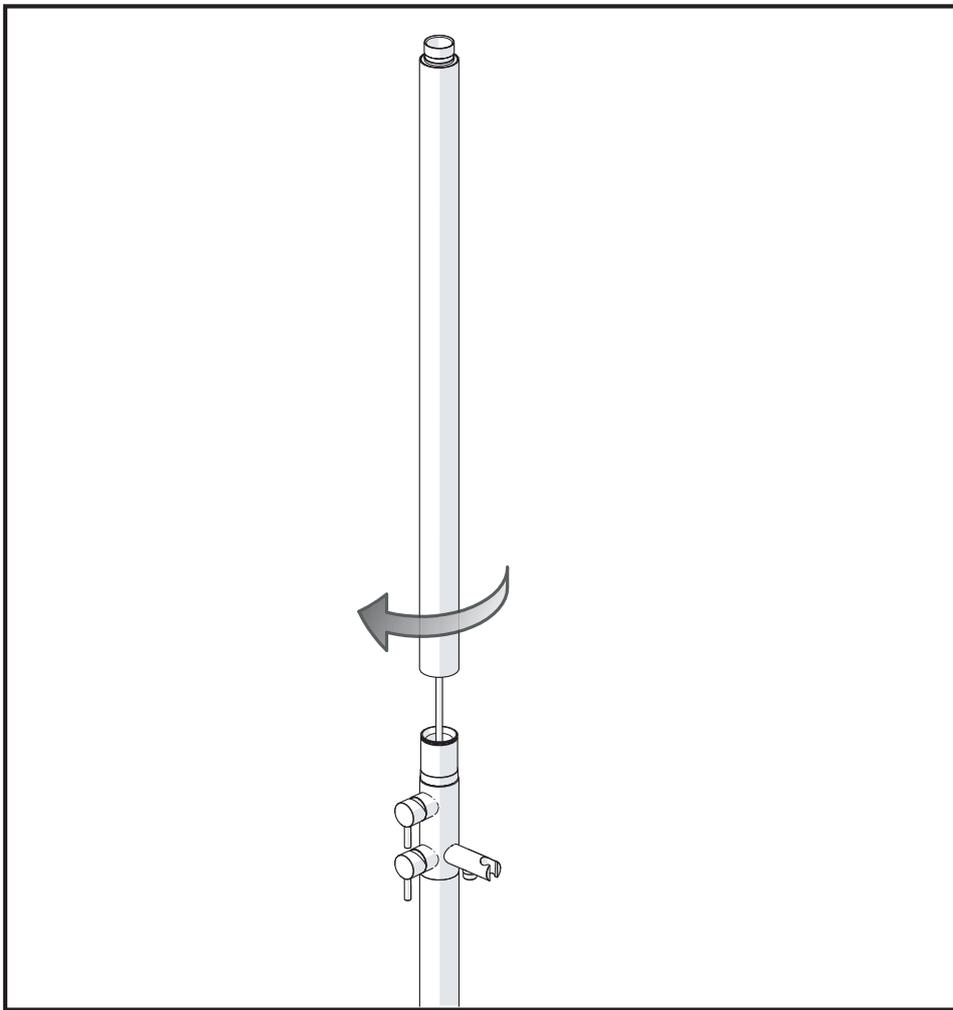

### Fissare la piantana

- Fissare la piantana a pavimento avvitando bene le viti in dotazione alla parte incasso.
- Far scendere la rosetta alla base fino a coprire la ghiera di fissaggio.

### Freestanding mixer fixing

- fix the mixer to the floor by well screwing the supplied screws to the built-in part.
- let the plain washer fall down at the base until it covers the fixing ferrule.

**9**

### Installazione parte superiore

- Avvitare il tubo superiore al corpo di miscelazione centrale e far passare il flessibile in modo che esca dalla parte superiore.

### Top part installation

- Screw the top part to the central body and let the flexible hose pass through the body pulling it out from the top part.

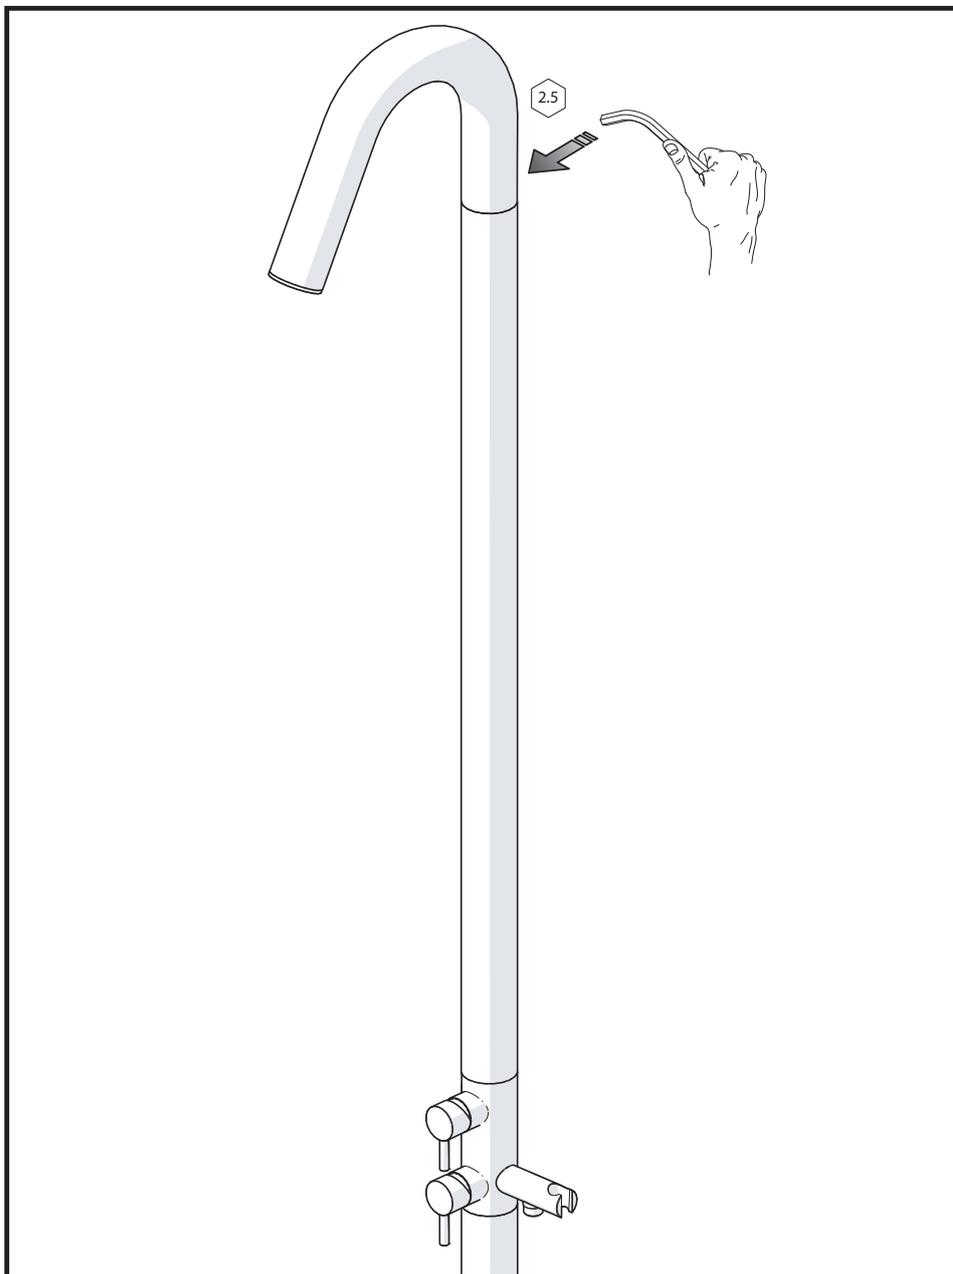

**10**

### Installazione soffione

- Collegare il flessibile del soffione a quello di uscita acqua miscelata.

### Shower installation

- Connect the shower flexible hose to the mixed water exit.

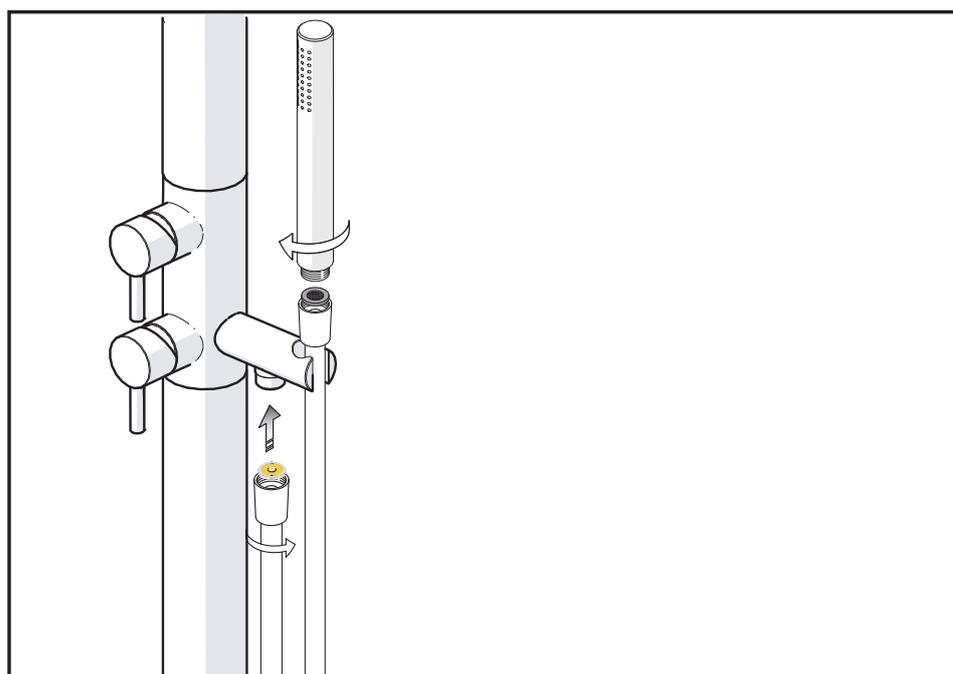

**11**

### Fissaggio soffione

- Posizionare il soffione nel tubo superiore, controllare l'allineamento desiderato e fissare il grano posteriore

### Shower fixing

- Place the shower on the top part, check if it is aligned and fix the back part

**12**

### Operazioni finali

- collegare il tubo al raccordo ed al doccino.

### Final operation

- connect the tube to the junction and to the shower-hand.
