Symmetra PX UPS is truly modular. What do we mean by that? [Take a look.](#)

No interruptions allowed.

With its redundant intelligence modules and power supplies, combined with high-performance architecture, the Symmetra™ PX UPS offers unsurpassed availability.

Why choose a Symmetra PX solution?

We can give you some very good reasons.

For starters, the Symmetra PX 3-phase UPS features agile, modular architecture, built on swappable components. Modules for power, batteries, static switch, control, and distribution are all engineered and designed to be easily added or removed.

Figure in its low total cost of ownership (TCO), and the choice becomes clear.

Why the low TCO?

- Energy Star® efficiency
- End-of-life expansion services
- Small module size for lower replacement cost
