Dati tecnici

Pressione dinamica minima:	0.5 bar
Pressione di esercizio massima:	5 bar
Pressione di esercizio raccomandata:	1-5 bar
Temperatura massime acqua calda:	80°

Norme di installazione, manutenzione e verifiche preliminari. Perché il suo prodotto funzioni nella maniera corretta e possa durare nel tempo, occorre vengano rispettate le modalità di installazione e manutenzione illustrate in questo opuscolo. Affidarsi ad un idraulico qualificato. Assicurarsi che l'impianto sia stato liberato da tutti i detriti e impurità esistenti.

Pulizia. Per una corretta pulizia, lavare esclusivamente con acqua sapone, risciacquare con una pelle di daino o panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detergents solidi o liquidi contenenti sostanze corrosive o acide, strofinacci prodotti con fibre sintetiche, spugne abrasive tamponi con fili metallici, poiché potrebbero alterare irreversibilmente le superfici trattate.

Consigli. Si consiglia l'uso di un addolcitore per prevenire la formazione di calcare e di filtri per trattenere le impurità, che entrando nel miscelatore causerebbero un cattivo funzionamento. Si raccomanda anche l'utilizzo di un riduttore di pressione se all'interno dell'impianto si hanno pressioni statiche superiori a 5 bar.

EN

Technical data

Minimum dynamic pressure:	0.5 bar
Maximum operational pressure:	5 bar
Recommended operational pressure:	1-5 bar
Maximum hot water temperature	80°C

Installation, maintenance and preliminary checking procedure. To ensure that the mixer tap unit functions correctly and lasts over time, the installation and maintenance procedures illustrated in this leaflet must be complied with. Have all work done by a qualified plumber. Ensure that all debris and dirt have been removed from the system.

Cleaning. To clean the unit correctly, use only soap and water, rinse and dry with a chamois leather or soft cloth. Never use alcohol, solvents, solid or liquid detergents containing corrosive substances or acids, synthetic fibre rags, abrasive sponges or steel wire scouring pads, since they may cause irreparable damage to the treated surfaces.

Useful advice. Users are advised to install a softener to prevent limescale formation and filters to trap dirt, which might cause malfunctions if they enter the mixer tap. It is also recommended the use of a pressure regulator if inside the system will have static pressures above 5 bar.

Caractéristiques techniques

Pression dynamique mini.:	0.5 bar
Pression maxi. d'exercice:	5 bar
Pression d'exercice recommandée:	1-5 bar
Température maxi. eau chaude:	80°C

Normes d'installation, d'entretien et vérifications préliminaires. En vue d'un fonctionnement correct et prolongé de votre mitigeur, respecter les modalités d'installation et d'entretien illustrées dans cette notice. Demander l'intervention d'un plombier qualifié. Vérifier que l'installation est libre de tous détritus et de toutes impuretés.

Nettoyage. Pour un nettoyage correct, laver exclusivement à l'eau savonneuse, rincer et essuyer avec une peau de chamois ou un chiffon doux. Éviter l'emploi d'alcool, solvants, produits détergents solides ou liquides contenant des substances corrosives ou acides, les chiffons synthétiques, les éponges abrasives et les pailles de fer, étant donné qu'ils peuvent endommager irrémédiablement les surfaces traitées.

Conseils. Il est conseillé d'installer un adoucisseur d'eau pour éviter toute formation de calcaire ainsi que des filtres permettant de retenir les impuretés sous peine de dysfonctionnement du mitigeur. Il est également recommandé l'utilisation d'un régulateur de pression à l'intérieur si le système connaît des pressions statiques supérieures à 5 bars.

AR

البيانات الفنية

أدنى ضغط ديناميكي:	0.5 بار
أقصى ضغط تشغيل:	5 بار
ضغط التشغيل الأمثل:	1-5 بار
أقصى حرارة للماء الساخن:	80 درجة مئوية

قواعد التركيب، الصيانة والفحص الأساسية
لكل يعلم خلاط يشكل جيد ويؤدي مع مرور الزمن، يجب مراعاة طرق التركيب والصيانة حسب ما هو وارد في هذا الكتيب.
الملوء إلى سкционي مهمل.
التأكد من خلو التجهيزات من المقايا الشوائب.

النظافة
لعمل نظافة صحية يفضل بفضل باليه، والصابون، الشطف ومن ثم التجفيف باستخدام جله الابل أو قطعة قماش ناعمة.
تستخدم أبدي الكحول، المنبيات، مواد التنظيف المائية أو سوائل تحيوي على مواد كاوية أو حمضية، قطع قماش مصنوعة من مواد كيميائية، إسفنجة كاشطة أو لبنة معدنية وذلك لأنها قد تغير السطح المعالج بشكل أبدي.

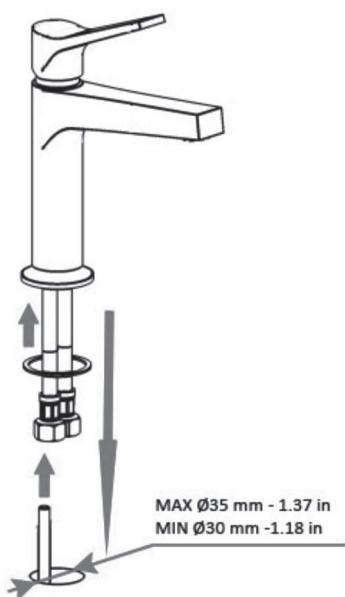

نصائح

يُنصح باستخدام فلتر تحلية للوقاية من تكون الكلس وفلاتر لمعالجة الشوائب والتي إذا دخلت الخلاط تتسبب في عمله بشكل غير سليم.

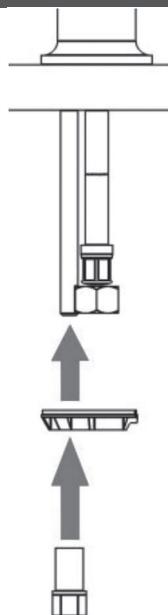

يُنصح أيضاً باستخدام تقاضة ضغط إذا تواجد في الشبكة ضغط ساكن يزيد عن 5 بار.

IMPORTANT**Pressure & Temperature Requirements.**

- ✿ Hot and cold water inlet pressures should be equal.
- ✿ Inlet pressure range: 150-1000 kPa
- ✿ New Regulation: -500 kPa maximum operating pressure at any outlet within a building.
(Ref. AS/NZS 3500.1-2003, Clause 3.3.4)
- ✿ Maximum hot water temperature: 80°C.
