

PLANTERS: LEAVES

| Categories: [PLANTERS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

The square-shaped planter LEAVES is made in steel 20/10 thickness. The 2 sides of the planter are characterized by a laser-cut leaf-shaped pattern. Behind the carving, there's a plate that can have a different colour so that it stands out. On the bottom of the planter 2 drain pipes, made in tubular steel, section 16X2 mm, H 50 mm, are welded. On the feet of the planter there are 4 holes 8 mm diam. for the fixing to the ground through specific bolts (not provided).

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max Dimensions:

Height: **500 mm**
Length: **500 mm**
Width: **500 mm**
Capacity: **105 lt**
Weight: **23 kg**
