DECORATIVE OUTDOOR LIGHTING

A family of bollards in three heights. Very simple design, the products Chiodo can be used both hidden inside the bushes, or in view. In the first case it highlights the lighting capacity, generating an intense light particularly suitable for scenic lighting of gardens or large vases with flowers and greenery. In the second case it can create magical compositions by using elements of different heights, such as small forests of pure light. Chiodo can be fixed in the ground by its spike, or on the floor through a small base. The product is available also in the applique version, which radiates the wall with a soft light and creates a unique and suggestive atmosphere. Chiodo applique can be used in different combinations, that give life to original lighting effects.

details

Aluminum coated carbon fibre finish rod. Spike for ground fixing in AISI 316 stainless steel. PMMA opal diffuser screen. No visible screws. Subsequently the product is painted by performing a double pass in-line process, which allows you to generate a single thick protective layer which then generates barrier against atmospheric agents and UV rays. This allows to achieve corrosion resistance performance in salt spray.
