Alki team is engaged daily in their values - cooperative culture, know-how, design and manufacturing in the Basque country. Our values are represented in products and materials, colours and manufacturing that we are using. The following few articles illustrate our research into the working environment.

EGON ARMCHAIR

Legs and frame in metal covered with oak. Slats in beech plywood. For optimal confort, injected foam on back cushion and seat cushion in 40 kg density foam; fully upholstered in fabric or eco-leather
Seat: H 410 mm

H 710 x L 975 x W 765 mm

EGON SOFA 2 SEATER

Legs and frame in metal covered with oak. Slats in beech plywood. For optimal confort, injected foam on back cushion and seat cushion in 40 kg density foam; fully upholstered in fabric or eco-leather
Seat: H 410 mm

H 710 x L 1650 x W 765 mm

EGON SOFA 3 SEATER

Legs and frame in metal covered with oak. Slats in beech plywood. For optimal confort, injected foam on back cushion and seat cushion in 40 kg density foam; fully upholstered in fabric or eco-leather
Seat: H 410 mm

H 710 x L 2370 x W 765 mm

EGON SOFA 4+ SEATER

Legs and frame in metal covered with oak. Slats in beech plywood. For optimal confort, injected foam on back cushion and seat cushion in 40 kg density foam; fully upholstered in fabric or eco-leather. The system allows many combinations.
Seat: H 410 mm

H 710 x L 3090 x W 765 mm
(+720mm each seater)

This side table integrate an height adjustment system and can be used as support for digital devices or just as a coffee table.

The *Egon* Lounge Collection

The Egon collection has been conceived with informal spaces in mind. It is composed by different complementary elements, such as poufs, coffee tables, a sofa system as well as a side table with height adjustment. All of these combine with each other to create spaces for work or leisure.

The table lamp doubles up as a small tray made out of solid wood. The light can be turned on and off with a gesture thanks to an integrated motion detector.

Heldu: bringing warmth to the office

Different modules of table surfaces can be joined together to create a variable length platform. Mobile partitions enable workstations to be laid out quickly according to working requirements. A container system is available in different widths and drawer options. Oak and leather finishes, present throughout the collection echo the realm of the traditional office.

Vertical table top partitions complete the collection and enable space to be organised accordingly. Electric wires run along the axis in a metal cable tray and power sockets are hidden by wooden and leather blocks.

HELDU CONTAINERS
DESIGNED BY IRATZOKI LIZASO

The Lan Task chair presented at the Orgatec 2018 Trade Fair will be launched in the second half of 2019.

Lan task chair in progress

Iratzoki Lizaso design studio is developing a new task chair. The idea is to provide a comfortable and friendly office chair, coupled with HELDU office desk to create a cosy atmosphere. Functional attributes are discreet. The mechanisms disappear under the seat, and the arms are an integral part of the backrest whose shape allows freedom of movement. Comfort and softness for a relaxed working environment.

LAN TASK CHAIR
DESIGNED BY IRATZOKI LIZASO

Working Chairs

KUSKOA BI TASK CHAIR

Five legs swivel with castors, jack for adjustment between 380 mm to 500 mm. Bioplastic shell, seat pad upholstered in fabric, eco leather and leather. Legs available in 2 mat colors: white or black

ARTICLE

The bioplastic is a polymer with similar characteristics and properties to plastics made from non-renewable fossil fuels. It can be injected, extruded and thermoformed.

ARTICLE

Kuskoa Bi: The Bioplastic Chair

The comfortable and generously-sized Kuskoa Bi is the first chair on the market to be manufactured in bioplastic. Its particularly enveloping shell, cut out in such a way as to optimize back and arm support, is delicately placed on a solid wood trestle. An upholstered version is also available.

Colour & Materials

Our selection of colours and materials reflects a chromatic boldness and harmony. Indeed, the different wood finishes are associated with a palette of fabrics and leathers that can be overlaid to create a rich and nuanced atmosphere. Selected natural materials reflect our environmental responsibilities.

We offer a selection of wood, fabric, leather and bioplastic finishes. This chart is the result of a close partnership with different manufacturers.

 Seat: 800 mm H 1000 x L 410 x W 480 mm
 Seat: 660 mm H 860 x L 410 x W 480 mm

LAIA HIGH BACK STOOLS

Solid oak structure. Seat in plywood. Upholstered in fabric, eco leather or leather and natural felt (4mm thickness). Foot rest with stainless edge.
 Seat: 800 mm H 1080 x L 400 x W 500 mm
 Seat: 660 mm H 940 x L 400 x W 480 mm

LAIA LOW BACK STOOLS

Solid oak structure. Seat in plywood. Upholstered in fabric, eco leather or leather and natural felt (4mm thickness). Foot rest with stainless edge.
 Seat: 800 mm H 1080 x L 400 x W 500 mm
 Seat: 660 mm H 940 x L 400 x W 480 mm

EMEA HIGH BACK STOOLS

Solid oak structure. Seat and back oak veneer or front with foam covered with leather or fabric. Foot rest with stainless edge.
 Seat: 800 mm H 1100 x L 420 x W 520 mm
 Seat: 660 mm H 960 x L 420 x W 520 mm

EMEA LOW BACK STOOLS

Solid oak structure. Seat and back oak veneer or front with foam covered with leather or fabric. Foot rest with stainless edge.
 Seat: 800 mm H 900 x L 380 x W 490 mm
 Seat: 660 mm H 760 x L 380 x W 470 mm

HELDU HIGH BACKREST STOOLS

Solid oak structure. Two finishes: oak veneer 2 faces or fully upholstered in fabric, leather or eco-leather. Foot rest with stainless edge.
 Seat: 800 mm H 1060 x L 490 x W 530 mm
 Seat: 660 mm H 910 x L 490 x W 530 mm

KUSKOA STOOL
DESIGNED BY JEAN LOUIS IRATZOKI

The manufacturing process involves various trades: carpenters, joiners, builders, finishers and, of course, master upholsterers. This allows precise assembly that precedes sanding, staining and varnishing by hand.

Manufactured in the Basque Country

Upon opening the workshop doors, your senses are overwhelmed by the smell of wood. The principle raw material, oak, comes from sustainably managed French forest. The drying process is slow and delicate, requiring between four and seven years to attain a material suitable for our purposes. Alki offers conviviality in a contemporary style, combining ancestral tradition and modern technology.
