ABOUT

At NORR11 we strive to rethink Scandinavian design in order to create timeless furniture pieces. We seek inspiration from nature and raw materials, which is evident in our products that often redefine materials, techniques and forms.

Fusing together cultures from around the world with simple Scandinavian design principles, we generate a unique perspective on furniture design.

Our name stands for our Nordic heritage and the day it all began, the 11th of November 2011.

Welcome to NORR11.

Elephant Chair

“With the Elephant Chair we aim to reinvent the classic wing chairs of Danish functionalism from the 1950’s but with a twist. The base is inspired by Japanese minimalist furniture, where each leg is designed as one single profile without visible joints. That gives the traditionally heavy lounge chair a light touch, which you will also see in the slightly curved seat and back. The Elephant Chair is a part of our new collection, which is based on the same foundation as our former collections; to work with natural materials, simple Scandinavian design, good craftsmanship and optimal comfort.”

Kristian Sofus Hansen, designer.

Designers
Kristian Sofus Hansen
& Tommy Hyldahl

Elephant Chair

The Elephant Chair, designed by Kristian Sofus Hansen and Tommy Hyldahl, is a modern interpretation of Scandinavian minimalism combined with Japanese aesthetics. The design is inspired by Danish upholstered chairs of the 1950's, while drawing visible characteristics from the already iconic Mammoth Chair. The result is a light and elegant lounge chair where the Elephant ear shaped back gently curves around the body providing superior comfort. The Elephant chair is hand-crafted with a solid oak wood frame. The chair comes in three frame varia-

tions; natural, dark stained and black, and can be upholstered with leather and wool.

The seat and back are made from the highest quality compression molded oak veneer shells. The two shells are pressed in the same press mold, and surround the body in a light soft curve. The legs are designed as one single profile without any visible joints. This enriches the experience of the material strength and exchange between the light and heavy dimensions; *"elegant and simple but sturdy without being clumsy"*.

Mammoth Chair

The Mammoth Chair has been our signature piece ever since we launched our first NORR11 furniture collection in 2011. Designed by the Danish designer Rune Krøjgaard and Norwegian designer Knut Bendik Humlevik, the Mammoth Chair is a welcoming modern wing chair. The wings extend outwards from the back of the seat, creating a pleasant homelike feeling.

Rune's passion for shapes and specific manufacturing techniques coupled with Knut's pursuit to create stylish yet functional furniture manifest themselves in the Mammoth Chair. The seat and

back are formed from the same compression mold, giving the chair its signature clean minimalistic look. The high back, hugging wings and fluffy upholstery provide superior comfort and sense of privacy, whether relaxing at home or lounging with others.

The Mammoth Chair is hand-crafted, using solid oak wood for its frame and laminated oak veneer for the seat and back. The frame comes in multiple colour ways; natural, dark stained and black, upholstered in enormous variations of fabrics and leathers.

“For me functionality is a key factor, and can never be ignored, if I can achieve pure style and functionality in a product, I’m glad.”

Knut Bendik Humlevik

The Mammoth Sofa by Rune Krøjgaard and Knut Bendik Humlevik is an elegant piece of furniture with the comfort of a lounge chair but the size to fit at least two people. The welcoming wings provide a sense of privacy and serenity, making the Mammoth Sofa perfect for public spaces, hotel lobbies and modern workspaces.

The sofa pairs well with the Mammoth Chair offering numerous possibilities of creating smart, intimate interiors with a warm and welcoming appeal. The Mammoth Sofa is hand-crafted with a solid oak frame and seat and back of laminated oak veneer.

Designers

Rune Krøjgaard
& Knut Bendik Humlevik

Mammoth Sofa

Designed by Kristian Sofus Hansen and Tommy Hyldahl, the Nomad is a comfortable lounge chair made of bamboo wood with leather cushions.

“We wanted to create a light natural lounge chair of bamboo with the comfort of a traditional lounge chair. The biggest challenge was without a doubt creating the large back and seat frames and a back leg that runs all the way from the floor to the top in one whole piece. We worked on it with local craftspeople and skilled manufacturers. After countless experiments we ended up with a highly comfortable and stylish lounge chair” says designer Kristian Sofus Hansen.

The Nomad Chair is a Nordic interpretation of the traditional Moroccan wicker chair where the number of joints is reduced to its function only. The name “Nomad” is a characteristic contraction of the terms “Nordic” and “Moroccan”.

The seat and back are made of two large molded bamboo frames, with inlaid French bamboo mesh. The semi-transparent bamboo mesh gives the large surface a light expression and highlights the Nomad’s beautiful construction.

The chair comes with a neck pillow with three height variations, as well as a seat cushion for optimal comfort. Both pillows are produced in leather, which compliments the warm bamboo of the Nomad.

Goose Lounge

The idea of the Goose Lounge Chair was to create a highly comfortable lounge chair that is small enough to fit into any kind of interior space. Its beautiful fabric and leather make it suitable for a hotel suite or complimenting a sofa in a private home.

The soft seat is contrasted by two pointing oak veneer legs crossing beneath the seat. The legs are available in natural oak, dark stained and black. The wide range of upholstery options include velvet, sheep skin, vintage leathers from Sørensen and various types of Kvadrat materials to personalise the chair.

NORR11
Goose Lounge, Smoked Oak with
Royal Nubuck Leather.

Samurai

Samurai Chair is a modern lounge chair, made from turned oak timber sections with the seat and back in high quality saddle leather or canvas.

Whilst studying hunting chairs of the mid-20th century, designers Kristian Sofus Hansen & Tommy Hyldahl have created a modern interpretation of the low-slung hunting chair type, with construction inspired by Japanese simplicity combined with the Danish stick chairs of the 1950's. Samurai is a highly considered piece of chair making based on stick chair construction popular in the 1950's, which marry different turned oak sections that support the seating comfort and

tectonic geometry. The chair is completed beautifully with a highly crafted round oak section meeting the back in an elegant form which completes the iconic Samurai silhouette.

Samurai is offered with saddle leather from Sørensen Leathers or premium quality re-enforced canvas, which folds around the chair like armour and carries the body with ease. The seat is mounted with brass rivets in order to achieve maximum strength, whilst the back is mounted with adjustable leather straps and brass buckles. Both the leather and canvas is hand-made in Denmark in proud Danish furniture tradition.

LE ROI

BENCH

The Le Roi series consists of a bench and a coffee table and is made from solid oak with inlaid French rattan mesh. Le Roi is the French word for King, and the series is a minimalistic interpretation of rattan furniture

from the French colonial time, merged with well known Scandinavian furniture archetypes, such as the three-leg circle table and the rectangular bench. Le Roi is constructed as a frame geometry of solid oak, with

French rattan mesh mounted with traditional methods. The tactile rattan mesh creates a translucent surface, which highlights the beautiful and simple construction. Designed by Kristian Sofus Hansen & Tommy Hyldahl.

Macchiato

The Macchiato Sofa is an asymmetric modular sofa, with a high content of down feathers and upholstered with elegant fabrics. The Macchiato Sofa is all about the quality of the fabrics and comfort, challenging the common square modular sofa. The unique combination foam, memory foam and down feathers ensure that the sofa aligns to your body perfectly. The seats are low and deep allowing for the ultimate lounge feeling when socialising or relaxing. All modules

come with accompanying pillows that welcome you to the sofa even before you sit down.

The 8 different modules can all be used individually as they are fully upholstered with a solid core. They can also be connected with other modules using the Click-Link system underneath the sofa, creating various types of sofas fitting larger environments or smaller ones.

The Macchiato Sofa comes upholstered with various fabrics and every sofa is made-to-order.

Madonna

Designed for pure comfort the Madonna Sofa is a modular sofa built with a strong core of plywood and high quality cold cure foam. With a deep seat and a low lounge feel frame the Madonna Sofa encourages relaxation. The design has a clean look, making it easy to compose and decorate with pillows and blankets. The 8 different modules provide numerous possibilities to create the ideal sofa for each individual space, from a regular two-seater to larger L-shapes and chaise lounge options.

The Madonna comes fully upholstered in Canvas, Medley and Velvet fabrics and every sofa is made-to-order.

Simple and clean shapes

—
*A collection of furniture
with clean expression*

MAN

Inspired by the Bauhaus era where simple and clean shapes were in focus, the MAN Series is a collection of furniture with clean expression. Minimal materials and a functional design philosophy make the MAN Series aesthetically pleasing. The frame is made in Denmark from stainless steel and the seat and back are made of reinforced canvas. The cushions are upholstered with high quality leather and filled with fine down filling.

The series consists of two- and three-seater sofas, lounge chair, daybed, chaise longue, coffee table and side table. The leather cushions come upholstered with various types of leather hides from Sørensen Leathers and the tables come with a fine black marble from the Iberian peninsula or a veiny green Indian marble.

Langue Dining

The Langue series is our most versatile furniture series with nearly unlimited potentials of combinations. It started as an idea to create a simple chair with a soft minimalistic appearance from a molded plastic seat and a frame of beech wood. A highly tasteful and functional shell chair at an attractive starting price to suit different stages of peoples lives. Today, the series includes dining chairs with eight possibilities of legs in both wood and steel, lounge chairs and the latest addition, a bar chair in two heights and the seat of the dining

chair making it a very comfortable bar chair. With the wide range of possible combinations of frame, shell colours and upholstery options, the Langue Chair can be customised to each and every scenario without compromising its basic concept.

Since we launched the Langue series it has been under constant development, making little tweaks here and there to achieve the best and strongest chair possible. The result is a beautiful, sturdy chair suitable for private homes and public settings.

*Equally suitable for home
use as the most challenging
public environment use*

Inspired by traditional Danish elementary school chairs, the NY11 Dining Chair has a frame hand-crafted from solid oak and a seat of laminated oak veneer. The Chair came to life when designers Rune Krøjgaard and Knut Bendik Humlevik went on a mission to create a modern take on the Scandinavian dining chair. Just like a school chair it had to be both comfortable and very durable. The result is a simple and honest chair with a time-less expression.

The NY11 series also includes bar chairs in two heights, 65 cm and 75 cm, designed to fit perfectly to a kitchen island in a private home or as a comfortable bar chair in public spaces.

The visible grains in the chair's structure emphasise the quality of the materials and give it a natural appearance. The chair is available with a seat cushion upholstered with leather and the frame comes in natural, dark stained and black.

NY11 Dining

Designers
Rune Krøjgaard
& Knut Bendik Humlevik

The design of the classic NY11 Dining Chair by Rune Krøjgaard and Knut Bendik Humlevik has been updated to make this strong chair even stronger. While still true to its simple and minimalistic design this improvement makes the chair equally suitable for home

use as the most challenging public environment use. We are proud to announce that the NY11 Dining Chair has now passed L2 testing by the Danish Technological Institute which makes it one of the strongest wooden chairs on the market.

Shanghai

Designers Rune Krøjgaard and Knut Bendik Humlevik, along with NORR11 founder and partner Tommy Hyldahl, went on a quest to China looking for inspiration to design a modern Scandinavian take on the ancient Chinese Horseshoe Chair.

It can be said that the design goes more than 700 years back, as they found an armrest on a chair dating back to the Yuan Dynasty, a period where Marco Polo was still in China. This became the inspiration for the Shanghai Chair. They started working with talented craftspeople and through trial and error, tweaking small details over the years, the final result is a distinctively modern take on the Yuan Dynasty's Horseshoe chair.

The Shanghai chairs were one of the first chairs produced by NORR11. The Shanghai Chair

was originally produced in Asia to preserve the original production methods of connecting solid wood pieces using woodworking joints and rarely using any glue or nails. In 2017 production was moved to Europe and the Shanghai Chair was reintroduced to the market.

The Shanghai Chair features a steam bent solid ash wood frame and a seat of handwoven paper cord or leather. The back and the armrest play a central role in the chair's construction, giving it an iconic shape and firm support. The high back provides comfortable support and the armrest effortlessly surrounds the body of the chair. The paper cord seat is hand-woven and the leather upholstered seat option comes with Premium or Vintage Leather from Sørensen Leather.

“
*It's still one of the designs
I'm the most proud of having
designed. Not only by the looks,
but the effort and work which
we put in to the chair.*

—
*From our drawings to the
final chairs, damn, there
was a lot of changes
and modifications.*

”
Rune Krøjgaard

Designers
Kristian Sofus Hansen
& Tommy Hyldahl

Elephant Dining

The Elephant Dining Chair is a dining chair version of the popular Elephant Lounge Chair. The legs are shared with the proven NY11 Dining Chair while the seat and back are pressed in the same soft curve as the Elephant Lounge Chair. The result is a light and elegant dining chair where the Elephant ear shaped back gently curves around the body.

Elephant Dining is produced with solid oak legs, with back and seat in laminated oak veneer. The seat and the back are upholstered in leather and textile of highest quality, and the refined 25 mm foam blend provides superior comfort. The upholstery gives the chair a solid look, which is contrasted by the slim contour of the veneer edge.

*A dining chair
version of the popular
Elephant Lounge Chair*

Langue Bar Chair

Langue Bar

The Langue series is our most versatile furniture series with nearly unlimited potentials of combinations. It started as an idea to create a simple chair with a soft minimalistic appearance from a molded plastic seat and a frame of beech wood. A highly functional shell chair at an attractive starting price to suit different stages of peoples lives.

The Langue Bar Chair comes with the same seat as the Langue Dining Chair making it a highly comfortable bar chair with great back support. The base is made from beech wood and comes in two different heights. The series comes in various finishes with a wide range of shell colours and upholstery options making it customisable to different settings.

Designers
Rune Krøjgaard
& Knut Bendik Humlevik

NY11 Bar

The NY11 series is inspired by traditional Danish school chairs designed throughout the twentieth century. The NY11 Bar Chair comes in two heights, 65 cm and 75 cm, making it perfect for kitchen islands in private homes or as a stylish bar chair for public spaces. A NORR11 bestseller since its launch in 2011 the NY11 series is designed by Rune Krøjgaard and Knut Bendik Humlevik.

The NY11 Bar Chair has a frame hand-crafted from solid white oak and a seat of laminated oak veneer and comes in various wood finishes. The chair can be upholstered with premium leather and vintage leather from Sørensen Leather as well as fabrics from Kvadrat.

Duke

The Duke tables are a series of multi-functional side and coffee tables with a spun metal tray loosely placed on top of a metal frame. The tray comes with rubber underneath to prevent it from slipping off. The tables come in small, medium and large and can easily be adapted to fit your needs, with the medium size particularly functional. The base can be rotated onto its different faces to create three different table heights, making them suitable to fit any height of sofa or to be used as a bedside table. When all three sizes are placed together they create a nice landscape that compliments any sofa.

*A solid table in
cast aluminium*

*Three pointy legs
& table top with a
groove in the outline*

Ghost

Ghost Coffee Table by Kristian Sofus Hansen and Tommy Hyldahl is a solid table in cast aluminium. The elegant table is cast with three pointy legs and table top with a groove in the outline that beautifully highlights the qualities of the material.

The table is removed directly from the mold without polishing, which gives each table a unique rough surface with the texture of the mold. The black-painted table has a beautiful and diverse surface, with alternation between a matte and reflective finish.

Designers
Kristian Sofus Hansen
& Tommy Hyldahl

JFK

Drawing inspiration from the late 50s, beginning of 60s era of Mad Men office desks, the JFK desk has a slim table top with three built in drawers. The drawers have a height of 4 cm making enough space for a laptop, papers and other things you might need to store in a modern desk. The drawers have elegant knobs made from aluminium with inspiration from old volume knobs from the Jaguar cars.

A unique attribute of the desk is that there is a built in space for a power supply to

connect a computer, printer or a smartphone charger. The power supply connects through one of the aluminium legs making sure that power cables don't disturb the overall clean appearance of the desk.

The matt black powder coated aluminium legs meet in the middle underneath the table top forming a conic shape giving the desk a light and elegant expression. The table tops come in black oak veneer or palisander veneer with a stunning pattern.

TABLE

The Le Roi series consists of a bench and a coffee table and is made from solid oak with inlaid French rattan mesh. Le Roi is the French word for King, and the series is a minimalistic interpretation of rattan furniture

from the French colonial time, merged with well known Scandinavian furniture arche-types, such as the three-leg circle table and the rectangular bench.

Le Roi is constructed as a frame geometry of solid oak, with

French rattan mesh mounted with traditional methods. The tactile rattan mesh creates a translucent surface, which highlights the beautiful and simple construction. Designed by Kristian Sofus Hansen & Tommy Hyldahl.

Shark

The Shark Coffee Table is made of solid dark stained Suar wood. The grain of the timber runs beautifully throughout the table, and in some cases natural variations in the timber are evident each creating their own unique character.

This type of wood has an impressive strength, making the table very durable and easy to maintain. The three pointy legs give the table an asymmetric and unconventional touch.

Maiden Cafe

Rune Krøjgaard & Knut Bendik Humlevik are the designers behind the Maiden series, a series of elegant and simple table legs for both domestic and public places. The Maiden series includes Dining table legs ideal for thick and substantial table tops and Café table legs that fit perfectly to any kind of café tables or smaller kitchen tables.

Their curved pedestal design and slim profile give focus on the table that they support and don't take away precious foot space under the table. The Maiden Café legs are now available with round white marble or a slab of dark stained Suar wood.
