

*Our Whisky stones are made with  
million-year-old stones, nothing less!*

*Crafted and extracted in Quebec,  
Canada by Lithologie*

## Our Story

*Inspired by nature and its beauty, we want to enhance the riches of our territory. Passionate about rocks, the fruit of our research allows us to tell you a fragment of our common history.*

*Operating in the utmost respect for our environment, we manufacture everything by hand. (Yes, yes, we will even extract the rock ourselves on the mountainside, without heavy machinery). Wanting to create synergy, we chose to work only with local products and manufacturers.*

*We have this desire to make you discover what our geological heritage has more unusual and wonderful to offer by designing small stone objects.*

*Incongruous and improbable, the meeting of Stéphane and Kim is like the project is a mix between modernity and heritage. After a few Facebook posts, a rock envelope sent by mail and many, many, many tests, our whiskey cubes are born. Having put all our soul in this story tasteless, we want to offer products that are good, that are durable and that, to be there, are beautiful! Deeply human, we made the choice to take our time to reveal our stones. In our approach, it is important to co-create with our customers and partners. It will take us almost a year and a half, but we are (very) proud to present you Lithology.*

### **KIM IS**

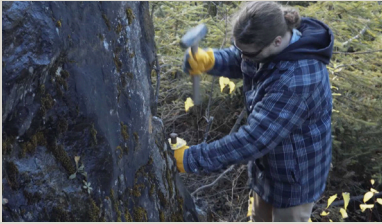

*The industrial designer and artist who was taught respect for nature from a young age, thanks to her grandma, remembers picking up rocks as souvenirs everywhere she went, even buying magazines about Quebec stones. A born entrepreneur, she is an optimist and a go-getter whose persistence is just what it took to get this passion project off the ground.*

### **STEPHANE IS**

*The man from the north who grew up close to nature, working with his hands, with strong convictions and deep-seated respect for the land, maintains the scientific rigour behind Lithologie.*

# Our Stones

Extracted on the territory of Quebec, by hand, with the greatest respect for nature, our stones will allow you to fully appreciate your amber spirits.

All our stones have the same characteristics in terms of freezing time and the ability to retain the cold. Just select the stone that fits the best your whisky collection!

Dedicated specifically for all amber spirits

(They bring the alcohols between 15-20 degrees.)

Does not dilute or alter alcohol

(because they are non-porous stones ; 0,2 to 2% of porosity)

Up to 11-15 minutes of optimal freshness

30 minutes in the freezer minimum for use

(Compared to 8h for soapstone.)

# Our Whisky Stones

## DARK GRANULITE AT HORNBLENDE

1

940 million years old, comes from the time when America continent was formed

Colours: deep black and finely crystalline, the Hornblende brings, sometimes, translucent dark green as well as copper-coloured lines

Origin: St-Élie-de-Caxton, Quebec, Canada

Set of 4 or 6 available

## HORNBLENDE GNEISS

2

940 million years old, comes from the time when America continent was formed

Colours: happy mix of dark emerald green and black, there are insertions of pearly white calcite crystals

Origin: St-Élie-de-Caxton, Quebec, Canada

Set of 4 or 6 available

## GABBRO

3

2.5 billion years old, is one of the Gabbro the oldest on earth from the Canadian Shield

Colours: marked with small black and white dots of varying size, with a predominance of black minerals

Origin: Chibougamau, Quebec, Canada

Set of 4 or 6

\* Note that each set comes with an official stone certificate.

# The Corporate personalization

We offer the opportunity to corporations to stamp their logo on the packaging and/or to engrave their logo or tagline on one side of the woodbox to make sure the gift you are giving to your good clients, customers or event employees are curated and branded.

For more information like minimum quantity, dimensions, options, timeframe of production, shipping rates and price, send us an email to [info@lithologie.ca](mailto:info@lithologie.ca).

## They trusted us

These are some companies that gave Lithologie's product branded with their logo to their clients, customers and employees.

# The Design UNESCO Program

We are also proud to be part of the program CODE SOUVENIR from Montreal City of Design UNESCO .

In June 2006, Montréal was named a UNESCO City of Design, and became part of the UNESCO Creative Cities Network, established in 2004. To date, the Network comprises 180 member cities in seven centres of creativity (Cinema, Crafts and Folk Art, Design, Gastronomy, Literature, Media Arts and Music), including 31 cities of design. Montréal UNESCO City of Design is thus a project for an entire city. A collective project that, to become a reality over time, demands that all stakeholders—elected officials, citizens, experts, entrepreneurs and designers—buy into it and make it their own & CODE is part of this project.

## Award & Support

Here the list of all the awards and support we had the chance to have with the project of Lithologie as much of subventions, prizes and entrepreneur program:

- Support program by School of Entrepreneur to start your business (2016-2017)
- Support program by SODEC for exporting, attending events & buying new machines
- Support program by LOJIQ for Entrepreneurship travel
- Support program by Novalex for Startup lawyer program
- 1st place at the Regional Competition in our category 2017 (manufacturing)
- 2nd place at the National competition in our category 2018 (manufacturing)
